

# OA/TOF: More prevalent, less recognised...

**Did you know around 180 babies are born with OA/TOF every year in the UK?** That means that on average every other day in the UK a baby is born with OA/TOF, a condition that has lifelong consequences.

The condition, and recognition of its lifelong impact, is less well-known than other conditions that have a similar incidence.

**Let's work to change that, starting now.**

**tofs**

lifelong support for those  
born unable to swallow
